Art Unit: 3641

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. In view of applicants' reply, claims 18, 23, 26 and 30 are withdrawn from consideration as not being drawn or generic to the elected species. They will be rejoined if they are ultimately dependent on an allowable generic claim.
3. Claims 1-17, 19-22, 24, 25, 27-29 and 31-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Otani et al. '969 in view of Aubert et al. '668, Shepherd '000 and French 465,082.

Otani et al. teach the basic invention of melt cast explosives with dinitro aromatics, oxidizer, aluminum metal fuel, etc. In view of Aubert et al., Shepherd and French 465,082, variation of the various notoriously well known additives, amounts and so forth would have been obvious. In particular, note the French reference which in lines 16-21, teaches the combination of aluminum metal, nitrated aromatic hydrocarbons, and ammonium perchlorate. Note that the broad recitations read on many and various dinitro aromatics as taught in the references, and that "oxidizer" of the broad claims reads on various oxidizers, including organic ones such as TNAZ of Aubert et al. In particular, Shepherd at col. 4, lines 5-6 suggests DNT, and at lines 14-18 following, that the amounts may be in the general range claimed by applicants. It is well settled that optimizing a result effective variable is well within the expected ability of a person of ordinary skill in the subject art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980), *In re Aller*, 220 F.2d 454, 105 USPQ 233 (CCPA 1955). Indeed, some of these references may be the epitome of obviousness, anticipation, as to the broader claims. *In re Pearson*, 181 USPQ 641 (CCPA 1974).

Dinitroanisole is a notoriously well known dinitro-aromatic, but proper claims limited thereto, e.g., requiring such, could be found allowable upon demonstration of unexpected results or

Art Unit: 3641

upon convincing argument, and upon overcoming the obviousness type double patenting which follows below.

The case of obviousness also exists with claims such as 12-14, 37, 38, 41-42, defined by results or properties, as the properties or results must follow from the recited material claim limitations. The results are inherent in the compositions. Where the product appears to be the same or only slightly different, the properties recited would appear to be inherent. The Office does not have testing facilities to determine such. The burden falls on applicant to show that the prior art products do not necessarily or inherently possess the claimed properties. *In re Thorpe*, 777 F.2d 695, 697, 227 USPQ 964, 966; *In re Fitzgerald*, 619 F.2d 67, 70, 205 USPQ 594, 596; *In re Best*, 562 F.2d 1252, 1255; 195 USPQ 430, 433-434; *In re Brown*, 459 F.2d 531, 173 USPQ 685.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-17, 19-22, 24, 25, 27-29 and 31-48 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the respective claims of copending Applications No. 09/893,337 and 09/747,303 ('303 to issue on 11/18/2003 as US Pat. # 6,648,998). Although the conflicting claims are not identical, they are not patentably distinct from each other because of clear overlap. In all cases, the basic ingredients are dinitro aromatic compounds with various additives. As claimed, the additives in the broadest claims of each

Art Unit: 3641

case differ, but all the claims have the scope of "comprising". Thus, the claims are amenable to this rejection as currently written. Potentially, this may be overcome in prosecution by limitations added to the respective claims to better define patentability.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
